

EmpowerED

Multilingual Learners

The Core Collaborative

The EmpowerED Learner Series

EmpowerED Multilingual Learners engage in the formative assessment process using learning intentions and success criteria aligned to their current language acquisition level. In order for students to self and peer assess to set goals, teachers must make language progressions visible for students. This student-centered process will strengthen partnerships with English Learners, and accelerate language acquisition progress with strategies for ALL!

Learning Goals:

- Leverage the formative process for language acquisition
- Explore the levels of language functions
- Determine how to identify language functions
- Create learning progressions for language acquisition
